

SNEH BHARATBHAI GOHEL

Aspiring Software & Full Stack Flutter Developer

+91-9979150856 @ snehgohel51@gmail.com Anand, Gujrat

SUMMARY

A software and full-stack Flutter development professional with experience in software development and full-stack application creation, expert in Python and Flutter. Key achievements include developing AI-Powered Music Generation App utilizing TensorFlow and Flutter and creating a comprehensive Vehicle Rental System enhancing user experience. Seeking a Python Developer position at Think Act Rise Foundation, where my software development and full-stack skills will support your mission of promoting talents, creativity, and innovative ideas for inclusive and sustainable development.

EDUCATION

Bachelor In Computer Engineering

Gujarat Technological University

01/2023 - 05/2026 Gujarat

Diploma in Computer Engineering

Gujarat Technological University

01/2020 - 05/2023 Gujarat

GSEB SSC

D.N. High School

01/2000 - 05/2018 Anand

PROJECTS

PluseTune

<https://github.com/Sneh-Gohel/PluseTune>

AI-Powered Music Generation App showcasing expertise in cross-platform development and machine learning

- Developed an AI-driven music generation application that creates dynamic music based on user input
- Utilized Flutter for frontend, Firebase for authentication, and MongoDB for storing generated music data
- Built an AI model with TensorFlow and Librosa

Vehicle Rental System

<https://github.com/Sneh-Gohel/VRS-Vehicle-Rental-System>

Vehicle Rental System (VRS) enhances user experience by providing a secure and efficient platform

- Developed a comprehensive Vehicle Rental System application designed to streamline the process of renting vehicles and registering drivers
- Key features include the ability to register as a driver and make advance bookings

S Messages

<https://github.com/Sneh-Gohel/S-Messages>

S Messages fosters social interactions and enhances user engagement through an intuitive interface

- Developed an online messaging application that enables users to connect and communicate effortlessly
- Utilized Firebase for user authentication and data management
